Summary

I am a software expert with an entrepreneurial focus. I have experience architecting applications and efficiently building them into profitable software products. Through starting my own companies, I have gained the ability to use customer needs to drive product development. I thrive most in small collaborative teams, and I work to make an immediate, positive impact.

Education

University of Colorado Boulder — B.S. Computer Science, May 2018

Experience

Co-Founder, ShipScout — 2020 - 2022

Bootstrapped an eCommerce app from an idea, to an MVP, to a growing and profitable product, and ultimately sold it. Drove profitability by building extremely low-cost and scalable APIs.

Senior Software Engineer, Yonomi/Allegion; Boulder, CO — 2019 - present

Leading software contributor to the next-gen ultra-scalable IoT platform which led to Allegion's 2020 acquisition of Yonomi.

Co-Founder, Hearth; Boulder, CO — 2017 - 2019

Bootstrapped the development of a smart home hardware product from the ground up through rigorous customer development, project management, and coding work.

Software

Typescript/JavaScript, Rust, Serverless & Event-Driven Design, more

I excel at identifying the best software design and tools for each use case. In addition to software architecture, I adapt quickly to different languages and frameworks in order to build fast. The result is an ability to meet customer needs through calculated usage of software.

Interests

I am passionate about the outdoors, especially skiing and mountaineering. I enjoy traveling, especially to National Parks and for hiking and biking. I play the guitar and love to run with my dog, Arlo.
